ID Vasisht-Shende

## Experience

### Senior Software Engineer

#### MindTickle

May 2021 – Ongoing

Pune

- Led the development of a comprehensive data platform from inception, focusing on designing data modeling, star schema, and end-to-end processes, utilities, and pipelines. Ensured seamless onboarding of diverse domains onto the data platform.
- Created a data platform that significantly enhanced efficiency, enabled data-driven decisions, and fostered innovation. Strengthened cross-functional collaboration, upheld data governance, and **achieved an 83% reduction in data latency to 10 minutes.**
- Implemented and designed data governance, self-service, and data cataloging platforms to facilitate efficient product analytics.
- Deployed a data sharing feature for customers using Snowflake, resulting in current savings of up to **\$35,000 and projected savings of \$100,000 upon complete onboarding.**
- Championed an initiative to integrate a shared cache layer using AWS Lustre/Alluxio, aiming to slash expenses by **\$48,000, representing a substantial reduction of nearly 63%.**
- Led an MVP initiative to deliver personalized sales readiness insights for representatives and companies, boosting performance, shortening ramp-up times, aligning sales metrics, and guiding reps to exceed benchmarks. **This feature contributed to closing \$1.8 million in deals over 18 months.**

### Technical Manager

#### Morgan Stanley

Aug 2018 – May 2021

Mumbai

- Developed an in-house Java-based money transfer portal, orchestrating wire transfers and standing instructions, leading to **eliminating reliance on external software.**
- Established 'Validation as a Service' to verify wire transfers based on available funds, recipient status, US regulations, etc., leveraging IBM ODM.
- Architected and constructed Approval and Consent services for wire transfers using microservice architecture.
- Showcased expertise as a Site Reliability Engineer (SRE), ensuring platform stability in Next Gen Payments.

## Education

B.Tech IT - VJTI, Mumbai

May 2018

CGPA: 8.25/10

## Publications

- Shende, V., & Karve, S. (2018). A comparative analysis of feature extraction techniques for face recognition. In *Iccict*, Mumbai: IEEE.
- Shende, V., Karve, S., & Hopfe, S. (2018). Semantic relatedness measurement from wikipedia and wordnet using modified normalized google distance. In *Lecture notes in networks and systems*, vol 43. Singapore: Springer.

## Technical Skills

Python Snowflake Airflow PySpark  
CubeJs JAVA Spring Kubernetes  
AWS Alluxio Lustre SQL  
Data Modelling Data Mesh DeltaLake

## Projects

### Braille Translator

#### Morgan Stanley Patented Project

Translated English to Braille for written communications with visually impaired customers. Integrated with Project Gutenberg to generate free Braille books for a partner NGO.

### WireTime Estimator

#### Morgan Stanley Innovation

Estimates ETA of wire transfer using the transaction details, enabling financial advisors to choose alternatives with shorter ETA.

### Society Services

#### Academic Project

Society Services is a portal where housing societies can order services such as lift maintenance, pest control, plumbing, etc, from registered service providers.
