WORK EXPERIENCE

Apollo 24 7(Quick Commerce)	Hyderabad,India
April 2022 – Present	
Principal Software Engineer Apollo 24 7 is the online channel of Apollo Pharmacy, India's largest retail pharmacy chain, boasting an OMNI channel order count of 6L orders per day and an online channel order count of 80-100k orders/day across pharma, consult, and diagnostic services.With a daily active user count of 6L, Apollo 24 7 plays a pivotal role in delivering healthcare services nationwide.	
As a Principle Software Engineer at Apollo 24 7, I have taken ownership of the core subscription business vertical, serving both retail and corporate users. My responsibilities include actively participating in product development by evaluating the impact and feasibility of new features in collaboration with product managers. Additionally, I work closely with cross-functional team members to design and implement more efficient user flows, ensuring a seamless and optimized experience for our users.	
Highlights	
Promoted to the role of Principal Software Engineer, becoming the youngest to achieve this position at Apollo 24 7 .	
Architected high-throughput services and fine-tuned performance metrics to achieve benchmark response times of 10ms .	
Engineered a robust system to implement various campaigns on datasets around 5M users utilizing Kafka.	
Developed a custom caching framework ensuring a 99% cache hit ratio , with auto eviction and boot-up on data mutations.	
Designed a backend-driven dashboard that updates with new features without deployment, achieving 90% backend-driven operations.	
Created a generic schedule-event service capable of handling 1M events within a 1-minute window.	
Normalized the caching data model in Redis, reducing memory usage by 50%	
Engineered reusable libraries to abstract numerous ad-hoc actions, enhancing productivity for over 100 engineers within Apollo's core platform team.	
Led a diverse team of 8 engineers across app, web, and backend disciplines, fostering collaboration and delivering outstanding product development results.	

Apollo 24 7(Quick Commerce)	Hyderabad,India
July 2020 – May 2022	
Senior Software Engineer As a Senior Software Engineer at Apollo 24 7, I have developed subscription micro-service from the scratch serving both retail and corporate users. My responsibilities include LLD, HLD, Unit test cases and writing code adhering to design patterns. Additionally, I work closely with cross-functional team members to design and implement more efficient user flows, ensuring a seamless and optimized experience for our users.	
Highlights	
Developed a subscription microservice from scratch, handling both read and write operations with a transaction per minute (TPM) rate of 5-6k	
Engineered the credit-integration-service microservice, managing HealthCredits credit and redemption post-order completion across pharma, diagnostics, and consults business verticals, processing over 80-100k orders/day .	
Crafted reusable libraries as part of Apollo's core platform team to abstract common use cases, including a logging system and wrappers over event bus and message brokers.	
Built a GraphQL API gateway using Apollo Federation and Apollo Server 4, enhancing the efficiency of onboarding new microservices.	
Contributed to the migration of Apollo 24 7's core React Native app to Redux and Redux-Saga , improving state management and application performance.	
Acted as the chief backend engineer for a pilot project, executing Apollo's largest marketing campaign on India's most-watched show, KBC , engaging over 20M users.	

Unacademy	Hyderabad, India
October 2020 – April 2022	
Full Stack Mentor(Part time) Full Stack mentor conducting live sessions, webinar and covering technologies on MERN stack	
Highlights	
Conducted live online workshops for a global audience, achieving a footfall of 200-500 participants in partnership with organizations like Edunoix and HeroVired.

Designed comprehensive course curricula and successfully completed over 10 live batches , providing in-depth training in various technologies.
Covered a wide range of technologies including Node.js, React.js, Redux, Material-UI, React-Router, Express.js, MongoDB, PostgreSQL, JavaScript (ES5, ES6), RabbitMQ, and hosting

Sayint.ai January 2019 – July 2020	Hyderabad, India
--	-------------------------

Software Engineer

Joined an very early stage start-up and have played crucial role in entire product development learning backend development and importance of design patterns at every stage.

Highlights

Developed scalable frontend and backend solutions utilizing a database-driven architecture for enhanced performance and reliability.
Accelerated product development by rapidly prototyping AI/ML services, making features ready for quick demos and product pitches.
Constructed scalable data pipelines to dynamically spawn Node.js processes, efficiently handling asynchronous actions by integrating with AI/ML services such as speech-to-text, compliance tagging, and PCI & PII masking.
Authored reusable code leveraging functional programming principles to ensure modularity and maintainability.
Managed the entire deployment of applications by creating an open-source module and integrating it with Microsoft Teams for streamlined operations.

Fidelity International July 2018 – January 2019	Gurgaon, India
---	-----------------------

Software Programmer

Joined as graduate programmer and worked on java on the backend and reactjs on frontend.

Highlights

Worked on an internal application for stock brokers to make their investments decision easier by showing analytics.

IndiaMART InterMESH Limited(intern) May 2017 – July 2017	Noida Area, India
--	--------------------------

Web Application Developer

Developed a chat bot application to ease the process of gathering information in regards to customers next travel destination.

Highlights

Developed a lead generation question bot using PHP, socket and HTML & CSS

 AWARDS

                             	Apollo 24 7  Outstanding Performer of the year 2021
                          	Sayint.AI  Outstanding Performer of the year 2021

 VOLUNTEER

Social reformation cell September 2014 – October 2015

Elementary School Teacher

Teaching the students in villages.
