}
```

### WORK EXPERIENCE

#### Principal Software Engineer, Apollo 24|7(Quick Commerce)

Apr, 2022 - Present

Apollo 24|7 is the online channel of Apollo Pharmacy, India's largest retail pharmacy chain, with an OMNI channel order count of 6L orders/day. With a daily active user count of 6L, Apollo 24|7 plays a pivotal role in delivering healthcare services nationwide.

- Promoted to the role of Principal Software Engineer, becoming the youngest to achieve this position at Apollo 24|7.
- Architected a robust system to implement various campaigns on datasets around 5M users utilizing Kafka.
- Revamped existing caching framework ensuring a 99% cache hit ratio, with auto eviction and boot-up on data mutations.
- Created a generic schedule-event service capable of handling 1M events within a 1-minute window.
- Engineered reusable libraries to abstract numerous ad-hoc actions, enhancing productivity for over 100 engineers within Apollo's core platform team.
- Leading a diverse team of 8 engineers across app, web, and backend disciplines, fostering collaboration and delivering outstanding product development results.

#### Senior Software Engineer, Apollo 24|7(Quick Commerce)

Jul, 2020 - May, 2022 1 year 10 months

As a Senior Software Engineer at Apollo 24|7, I have developed subscription micro-service from the scratch serving both retail and corporate users. My responsibilities include LLD, HLD, Unit test cases and writing code adhering to design patterns. Additionally, I work closely with cross-functional team members to design and implement more efficient user flows, ensuring a seamless and optimized experience for our users.

- Developed subscription microservice from scratch with (TPM) rate of 5-6k.
- Engineered the credit-integration microservice, dealing HealthCredits earning and redemption post-order completion across all business verticals, processing around 100k orders/day.
- Crafted reusable libraries as part of Apollo's core platform team to abstract common use cases across the engineering in apollo.
- Built a GraphQL API gateway using Apollo Federation and Apollo Server 4, enhancing the efficiency of onboarding new microservices.
- Contributed to the migration of Apollo 24|7's core React Native app to Redux and Redux-Saga, improving state management and app load time by 60%.

#### Software Engineer, Sayint.ai

Jan, 2019 - Jul, 2020 1 year 6 months

Joined a very early stage start-up and have played crucial role in entire product development learning backend development and importance of design patterns at every stage.

- Developed scalable frontend and backend solutions utilizing a database-driven architecture for enhanced performance and reliability.
- Constructed scalable data pipelines to dynamically spawn Node.js processes, efficiently handling asynchronous actions by integrating with AI/ML services such as speech-to-text, compliance tagging, PCI & PII masking.
- Authored reusable code leveraging functional programming principles to ensure modularity and maintainability.
- Managed the entire deployment of applications by creating an open-source module click2deploy and integrating it with Microsoft Teams for streamlined operations.

#### Software Programmer, Fidelity International

Jul, 2018 - Jan, 2019 6 months

Joined as graduate programmer and worked on java on the backend and reactjs on frontend.

- Developed a dashboard for brokers showing analytics, to ease their investment decision easier.

**Web Application Developer**, IndiaMART InterMESH Limited(intern)

May, 2017 - Jul, 2017 2 months

Developed a chat bot application to ease the process of gathering information in regards to customers next travel destination.

- Developed a lead generation question bot using PHP, socket and HTML & CSS

SKILLS

Backend

PostgreSQLNode.jsGraphQLRedisSQLMongoDBJavaSpring BootJestSystem DesignDesign PatternsMicroservicesKafka

Frontend

EDUCATION

**Electrical, Electronics and Communications Engineering, B.Tech**, National Institute of Technology, Delhi

Aug, 2014 - May, 2018

7.7CGPA

AWARDS

**Outstanding Performer of the Year** , Apollo 24|7

Awarded on: Mar 01, 2021

**SPOT Award** , Sayint.AI

Awarded on: Feb 01, 2020

VOLUNTEER WORK

**Elementary School Teacher**, Social reformation cell

Sep, 2014 - Oct, 2015

Teaching students in villages.

PUBLICATIONS

**click2deploy** , Open Source

Published on: Mar 28, 2020

click2deploy pulls the latest code from provided git URL and copies into the remote directory. After copying it executes a bash file which is present in the remote server. You can maintain the bash file to build the application, install dependencies, start the process(PM2).
