

Career Summary

Results-driven AI & ML professional with **5+ years** of experience leading AI solution development and deployment across industries. Expertise in **product management, strategic project leadership, and client relationship management**, driving innovation, efficiency, and impactful results

Education

- 2020-2022 **Indian Institute of Management, Calcutta (IIMC)**, *Post Graduate Diploma in Business Analytics*, GPA: 8.81/10
2014-2018 **Indian Institute of Technology, Delhi (IITD)**, *Bachelor of Technology*, GPA : 7.87/10.00

Professional Experience

May'22- **Kearney, Lead AI Scientist, Bangalore, India**
Present *Leveraging AI & ML expertise to build innovative products and enhance efficiency*

Generative AI Projects: Developed **10+ Gen. AI** products on text summarization, retrieval & effective image generation

- Designed a rapid image generation solution by fine-tuning a **Stable Diffusion** model using **LoRA**, achieving a **30% reduction in development time** by optimizing real-time data simulations for industrial applications
- Fine-tuned **Llama-3.1** using **QLoRA** on supply chain data, deployed a **FastAPI** chatbot increasing **efficiency by 40%**
- Engineered an advanced risk assessment tool for a pivotal government agency in KSA using **OpenAI API**, dramatically boosting supply chain reliability across various industries while **slashing research time by 90%**
- Developed an AI tool for checking regulatory compliance using **Langchain & RAG**, **cutting turnaround time by 80%**
- Revamped AI-driven talent acquisition, cutting hiring time by **80%** and enhancing assessment quality via advanced **resume screening** and an **interview chatbot** using **OpenAI API & Streamlit** for a major financial firm

AI/ML Projects: Driving Business Transformation with Advanced AI & ML Solutions

- Transformed the supplier selection process for a major US IT firm by categorizing labor contracts using **LDA topic modeling**, enhancing operational efficiency by **reducing supplier evaluation time by 40%**
- Optimized print quality for a leading US printing agency by developing a **Random Forest Classifier**, achieving a remarkable **90% prediction accuracy** and effectively **reducing defects by 31%**
- Implemented a highly comprehensive supply chain optimization model for a prominent tool manufacturing company using advanced **CBC solver techniques**, successfully achieving a significant **5% cost reduction** in operations

Stakeholder Engagement & Leadership: Expertly navigated stakeholder relationships to drive organizational success

- Led a team of **10 AI** scientists, managing workflows, mentoring, and ensuring timely delivery of high-quality AI solutions
- Boosted **project delivery efficiency by 25%** through effective collaboration with cross-functional teams and partners
- Led stakeholder management with key clients, boosting **client retention by 30% & scope expansion by 20%**

Oct'21- **Kearney, Data Science Intern, Bangalore, India**

Apr'22 *Optimized real estate footprint for a leading apparel retailer across USA*

- Strategically pinpointed **new store locations** & guided **closures/relocations** using client and alternative data sources
- Modelled **commercial viability** of locations using **regression models**, achieving an **R² of 85%**
- Devised an **optimization engine** to determine the best footprint using **store catchment areas**

July'18- **Maybank, Big Data Engineer, Bangalore, India**

Oct'20 *Orchestrated maintenance of a big data model, critical for assessing bank's financial health*

- Streamlined complex data pipeline processes with robust **ETL frameworks**, significantly enhancing overall data quality
- Automated key processes, saving over **60 man-hours per month** and **reducing delivery time by 40%**
- Conceptualized a centralized **master data repository**, effectively eliminating data silos and **standardizing** information across the enterprise, which significantly **reduced operational response time by 80%**
- Engineered a highly scalable and easily configurable **data quality** component using **PL/SQL**, which significantly improved data integrity with a notable **98% reduction in error instances** across multiple systems

Achievements

- Promoted to **Lead AI Scientist** at Kearney for outstanding contributions to AI-driven solutions and leadership
- Consistently achieved '**Next Level**' ratings in the **last 2 rating cycles** at Kearney, signifying top-tier performance
- Awarded with a **Pre Placement Offer (PPO)** from Kearney for developing an innovative approach to solve geo-analytics
- Represented Maybank as a key delegate in '**Maybank Group Program**' in Malaysia with participants from **10+ countries**
- Awarded '**Best Individual Performer of the Sprint**' twice at Maybank for exceptional contributions and leadership

Technical Skills & Tools

Skills Generative AI (Multimodal), LLMs, vLLM, HuggingFace, Machine Learning & Deep Learning, CI/CD Model Deployment, Kubernetes, Docker, MLflow, Ray, TensorFlow, PyTorch, NLP, Big Data, Data Analysis & Business insights, Strategy Development, Stakeholder management, Project management

Tools Python, Langchain, R, SQL, Hadoop & Spark, MLOps, LLMOps, Azure & AWS, PowerBI & Tableau, Excel
