Result-oriented professional with **4 years of experience** in IT and Consulting, specializing in **Salesforce, MuleSoft, and Databases**. Proven track record in building client relationships, managing projects, and optimizing Sales Processes for Retail Sector clients. Recognized for increasing sales by **49.6%** through Salesforce CRM automation.

EXPERIENCE

Infosys, Kolkata - Senior Associate Consultant

Nov 2024- PRESENT

- Worked with clients across **US, EMEA** to understand requirements and create customized data using **Flows, Apex, LWC, Agentforce & Data Cloud**
- Handled package deployment using **GIT, Bitbucket** and increased test class coverage to more than **85%**.
- Drove the implementation of MuleSoft integration between Data Cloud and custom connectors

Deloitte, Bangalore - Consultant

Jun 2023- Oct 2024

- Collaborated with leadership on **2+ client pitches, effort estimations, Proof of Concepts** and **demos** resulting in successful **RFPs**
- Worked with Scrum Lead to gather **functional requirements** and estimate User Stories and create **Technical documentation** along with discussion with client on feasibility and enhancement of Sfdc Architecture.
- Supported an Indian Retail Client in Salesforce CRM development using **Aura, LWC, Apex, Email-to-Case, Flows, Reports, Process Builders, Postgres, Integration, Change Management** and other Heroku Addons.
- Conducted **5+** training sessions on Salesforce flows and Functional development (**Profile, Roles, Validation Rules, Record Types, Page Layouts, Sharing rules**) to build a well-informed and technically adept practice
- Analyzed **Code Reviews**, Optimizing Triggers on Account and Case Objects following **Governor Limits**, improving performance by **40%**

Deloitte, Bangalore - Analyst

July 2021- May 2023

Worked with the first-ever Indian Client on a large-scale digital transformation program:

- Led the development of an enterprise-wide data platform on Salesforce Sales Cloud reducing operational costs by **70%**.
- Utilized Heroku and MuleSoft for integration with the client's database system.
- Built a fully automated system in MuleSoft AnyPoint Studio:
 - Consumed files from SFTP.
 - Upserted data in Heroku Postgres.
 - Sent automated emails with information on the processed data.
 - **Reduced time complexity of file processing by 90%.**
- Collaborated with stakeholders to understand their data structure and built complex queries based on various use cases via **Heroku and Postgres Database**
- Developed customisable components in SFDC using **Triggers, Aura, Apex along with Test Classes for Unit Testing.**
- Effectively identified and **solved** high priority technical issues reported in the production environment, maintaining system uptime of **99.9**
