Education

Panimalar Engineering College

B.E. Computer Science and Engineering

May 2014 – April 2018

Chennai, TN

Experience

Zoho

August 2019 – December 2024

Member Technical Staff

Chennai, TN

- **Kiosk Studio:** Co-led the design and development of this flagship feature of Zoho CRM, from concept to completion within tight deadlines.
- Ensured adherence to coding and performance standards, addressed diverse use cases, and collaborated with cross-functional teams to integrate multiple CRM components seamlessly.
- Offloaded complex operations to a scheduler, enhancing system efficiency, and implemented Redis to manage execution limits, optimizing resource utilization and overall performance.
- Developed and integrated advanced logging mechanisms to detect potential system failures and proactively trigger fixes, resolving issues before customer impact and significantly reducing resolution time.
- Efficiently addressed numerous customer requests following increased adoption, delivering timely enhancements that resulted in high customer satisfaction and positive feedback.
- **Followup Settings:** Took ownership of a partially developed and unfinished feature, successfully driving it to completion and ensuring its full functionality.
- Made a key performance decision to offload processing with Kafka, optimizing system efficiency and enhancing overall performance.
- **Template Library:** Engineered a reusable library by decoupling dependencies from the existing codebase, ensuring seamless integration across Zoho products
- Created comprehensive technical documentation with clear implementation steps, published articles to promote the library across Zoho, and provided hands-on support during the adoption process, leading to successful integration by five products.
- Spearheaded multiple enhancements to the Template Library, addressing customer requirements, supporting existing adoption needs, and driving adoption for new Zoho products.
- Built a testing environment using Spring Boot Framework to validate Zoho CRM's core functionalities JAR, contributing to its development.
- Managed multiple CRM features simultaneously, handling enhancements collaborating with team members, and addressing customer queries on time, consistently achieving customer satisfaction

Infosys

June 2018 – July 2019

System Engineer

Chennai, TN

- Designed and implemented RedCluster, a cloud-based system on Azure, to centralize and process large volumes of data for Microsoft using ETL processes.
- Optimized system performance, reducing data processing times, and conducted User Acceptance Testing (UAT) to ensure alignment with business requirements.
- Led GDPR compliance efforts by classifying PII data, developing stored procedures in SQL, and building Power BI dashboards to monitor compliance.
- Conducted requirements and gap analysis, provided post-deployment support, and collaborated with end-users to enhance system adoption and usability.

Technical Skills

Languages: Java, JavaScript, Python, C, HTML/CSS, SQL, PSQL, NoSQL, JQuery, REST, Handlebars

Tools: Git, Postman, Mercurial, VS Code, Eclipse

Technologies/Frameworks: Linux, Struts, Springboot, Kafka, Redis, Schedulers, Lyte, Postman

Additional Skills: Agile Methodology, Utilization of GPT, SDLC

Soft Skills: Problem-solving, Teamwork, Fast learning, Adaptability
