

Kajal Kumari

Senior Software Engineer - Java, Spring Boot, Microservices

7341151828 | kajalsahu73411@gmail.com | Noida (Open for PAN India) | <https://www.linkedin.com/in/sahu-kajal/> | <https://kajal-kumari-ml.github.io/portfolio/>

SUMMARY

Senior Software Engineer with **4+ years** of experience building backend systems for EdTech, IT services, and product platforms. Strong expertise in **Java, Spring Boot, Microservices**, Kafka, MongoDB, and REST APIs, with hands-on ownership of production applications. Worked on platforms handling **20 million questions** and **25,000 active users**, delivering scalable features, data migrations, and backend integrations across multiple projects.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript
- **Backend Frameworks & Architecture:** Spring Boot, Spring Data, Spring Security, Microservices, REST APIs
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Messaging & Search:** Kafka, Elasticsearch
- **Authentication & Payments:** Auth0, Braintree
- **Testing & Code Quality:** JUnit, Jackson, Lombok
- **DevOps & Version Control:** Git, Jenkins, GitLab API
- **Frontend (Working Knowledge):** HTML, CSS, Angular, Thymeleaf

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Extramarks Education

Feb 2025 – Jan 2026 | Noida

- Worked on backend systems for large **EdTech** platform managing 20 million questions using **Java** and **Spring Boot** within a **Microservices** setup
- Developed **AI**-powered answer explanation features for Science and Math, supporting usage of 25,000 users on production systems
- Executed database migration using Python, PostgreSQL, and MongoDB, processing 25 million records and migrating 450,000 records for scalability
- Improved production stability by resolving 6 issues monthly, reducing recurring defects by 10%, and upgrading services from **Java 11** to **Java 17**
- Optimized Extramarks queries performance by restructuring inefficient queries and introducing database indexing to reduce response times
- Delivered backend enhancements converting objective questions to subjective formats, contributing to 45–50% improvement in learner engagement

Java Developer | Redblink Private Ltd

Sep 2022 – Feb 2025 | Chandigarh

- Led backend ownership for **4** client-facing applications using **Java, Spring Boot**, and **Microservices** in **IT services** delivery environment
- Owned scalable backend components supporting 50k+ users, handling APIs, data persistence, and service integrations across production systems
- Implemented payment-related enhancements including secure card save functionality, contributing to smoother checkout flows across applications
- Coordinated weekly requirement discussions with clients on SMB and 5Plus projects, translating business needs into backend features and APIs
- Earned **Employee of the Month** recognition in **2023 & 2024** for consistent delivery, ownership, client satisfaction

INTERNSHIPS

Software Developer Intern | Relinns Technology

Mar 2022 – Aug 2022 | Mohali

- Gained hands-on exposure by contributing to internal projects, building backend components in **Java** and **Spring Boot** and 2 frontend screens using HTML, CSS, JavaScript, Angular
- Introduced unit testing practices during development, strengthening code reliability and reducing defect occurrences across early-stage application features

Software Developer Intern | TIVO Corporation

Aug 2021 - Feb 2022 | Bengaluru

- Supported internal engineering tools by adding 3 features and working on 3 UI components using HTML, CSS, JavaScript, and Thymeleaf
- Applied backend fundamentals while assisting with 2 **Spring Boot** modules, gaining early exposure to internal platform workflows and developer productivity systems

KEY PROJECTS

CODE CONDUCTOR - Code Generator

- Built backend code generation system for 5 active clients using **Java** and **Spring Boot**, enabling reusable templates for faster application setup
- Designed integrations with GitLab API and external data sources, scraping 30,000 records to automate variable and configuration management
- Enabled developer productivity improvements of 30–40% through standardized code templates and weekly usage across engineering teams

5plus - Mentoring Platform

- Created mentoring platform backend supporting 1,000 registered users and 500 monthly active users using **Java** and **Spring Boot**
- Configured authentication flows with Auth0, implementing 3 login methods, 2 meeting-related backend features
- Simplified user discovery by adding basic search functionality, improving mentor–mentee connection flows within platform

Store Management Application (SMB)

- Developed backend system for small-scale store management supporting 3 user roles and 4 stores using **Java** and **Spring Boot**
- Constructed 350+ backend APIs covering store management and user-to-store allocation with database handling of 3,000 records
- Established initial production deployment and applied SOLID principles to improve code structure and long-term maintainability

Medialeap - Streaming Application

- Delivered backend features for streaming platform serving 5,000 active users using **Java** and **Spring Boot**
- Optimized payment workflows, adding 2 payment-related features and resolving 10 production and testing issues
- Increased user engagement by 2–3% through enhancements such as saved cards, search, sorting, and favourites

EDUCATION

BTech in Computer Science

Lovely Professional University (LPA) | Jalandhar, Punjab | Aug 2018 to Aug 2022 | 7.8 CGPA
