SKILLS

DATABASE | RDBMS • SQL • MS-SQL • NoSQL • PostgreSQL

CLOUD PLATFORM | Google • Amazon

DATA WAREHOUSING | ETL • Big Query • Redshift

BACK-END DEVELOPMENT | Advance SQL • Python

DEVELOPMENT TOOLS/SERVICES | GCS • IAM • Apache Airflow • Cloud Composer • Dataflow • Git • Jira • Jenkins • Control-M • Looker PyCharm • Hadoop • Pub/Sub • Beam • PL/SQL Developer • DevOps

SUMMARY

Demonstrated history of working in data engineering of 5.5 years. I am always keen to learn new technologies and highly proficient in all aspects of software and data engineering. Worked in Fintech, Banking and Telecom domain.

EXPERIENCE

HSBC | SQL, Cloud, ETL, DWH, Python | Data Engineer | November 2021 – Present

Finance on the Cloud - Model Execution Platform

- Design and developed strategy data migration from on-premises to the cloud.
- Improving performance by **30%** via data quality checks on end-to-end system, data integrity and lineage creation.
- Led the migration from oracle to cloud platform using GCP, Big Query, GCS, IAM, Airflow, Composer, Dataflow, Data proc, Hadoop, and AWS Redshift resulting in a **15%** performance increase.
- Proficient in SQL, ETL, Data modelling, Python with a strong problem-solving approach utilizing scrum methodology.
- Studied and revamped data dictionaries to include a more robust history for developing consistency and accuracy of data throughout its end-to-end lifecycle.
- Worked well independently and with team.
- Designed and implemented a real-time data pipeline to process semi-structured data.

Leverage Ratio Consolidated and Reporting Tool

- Developed ETL pipeline by integrating millions of raw data from **20+** data sources.
- Designed, Developed and maintained the data pipeline architecture for a new product, ensuring it is aligned with business requirement.
- Communicated with cross functional team, project managers and analysts about data pipelines that drove efficiency KPIs up by **26%**.
- Maintained **99.8%** data pipeline up-time while ingesting batch, stream and transactional data across 4 different primary sources.
- Extracted data from legacy system, performed Data validation, Data cleaning, staging, transform, load.
- Automated ETL processes across billions of rows of data, which reduced manual workload by 24% monthly.
- Created data views and sent it to data analyst, data scientist to do further analytics in Power BI.

CERTIFICATION

Google Cloud | Certified as **Professional Data Engineer** | April 2021

Amazon Web Services | Certified **Solution Architect** Associate (AWS SAA) | Feb 2022

EDUCATION

Bachelor of Engineering | Electronics | Aug 2016 | CGPA 7.58

Consolidated and Reporting Tool

- Skilled in performance tuning, debugging error handling in large-scale data environments.
- Developed database objects like views, materialized view, tables, constraints, cursor, stored procedures, functions, triggers.
- Strong understanding of DevOps tools such as Git, CI/CD pipelines with Jenkins, issue tracking with Jira and agile.
- Map and allocate tasks within projects and mentoring team members on best code practice also training to new employees.
- Performed global stress testing on data for monthly, quarterly and annually using SQL and data warehousing concepts.

Tech Mahindra - O2 Telefonica UK | SQL, PL/SQL, GCP, ETL | May 2019 – Oct 2021

- Created technical design for telecommunication application and developed using GCP, Oracle PL/SQL, SQL and Unix based on business requirement and functional system design.
- Developed coding solution and collaborates with business users on requirements, analyzed them in detail and developed clear specs, and converted them into technical design.
- Migrated existing applications to GCP Big Query and improved efficiency
- Extensively used bulk collect to process big data/large volumes of data.
- Helped troubleshoot complex software and coding architectural problems.
- Strong client interaction skills and ability to handle business rules, metrics and requirements.

Ambrosia | Software Developer | SQL, ETL, DWH, DevOps | Aug 2018 – Nov 2018

- Developed coding solution and created database projects.
- Developed and deployed Stored procedures, complex SQL queries, used advance SQL for data fetching and manipulation on development server.
