

Kalyani Singh (Sr. Android Developer)

Mobile: - +91-9309966290

Email: Kalyani.singh5@gmail.com

Bangalore

Results-driven Android developer with 8+ years of expertise in secure, high-performance apps for mobile, tablet, and Android TV (OTT). Passionate about innovation, and crafting seamless user experiences.

PROFESSION SUMMARY

- 8+ years of experience developing and publishing Android apps using Java & Kotlin.
- Proficient in the full SDLC, including development, documentation, testing, and maintenance.
- Strong in OOP, design patterns (MVC, MVP, MVVM, Clean Architecture), and Jetpack Compose.
- Skilled in integrating Google Maps API, Firebase Cloud Messaging, RESTful APIs, and third-party libraries.
- Focused on writing test cases and maintaining high code quality.

WORK EXPERIENCE

Senior Software Engineer – Ovyo Services, Bangalore (Nov 2023 – Mar 2025)

Senior Software Engineer – Robosoft Technologies, Bangalore (Mar 2022 – Sep 2023)

Senior Software Engineer – Tech Mahindra, Bangalore (Oct 2018 – Mar 2022)

Software Engineer – Credentek Software, Pune (Mar 2016 – Jun 2018)

Software Engineer – Poorvanchal System, Pune (Jul 2015 – Feb 2016)

TECHNICAL PROFICIENCY

Languages & Technologies: Kotlin, Core Java, Jetpack Compose, Leanback, Coroutines, Flow
IDE: Android Studio(Jellyfish)

Architecture & Patterns: MVVM, MVP, MVC, Clean Architecture, Dependency Injection (Hilt)

Database & Data Format: SQLite, Room, Firebase Datastore, File Storage, XML, JSON

Networking: Retrofit, REST APIs, WebSocket

Background Processing: Work Manager, Services

Media & Streaming: ExoPlayer, Brightcove, Bitmovin Player

Payment Gateway: Juspay, Paytm

Messaging: Firebase Cloud Messaging (FCM), , Push Notifications

Libraries & SDKs: Glide, Picasso, Shimmer, In-App, Clever Tap, Apps Flyer, Google AdMob

Testing: JUnit, MockK, Espresso

CI/CD & Tools: Git, Jenkins, GitHub Actions

Analytics & Monitoring: Firebase Analytics, Firebase Crashlytics

ACADEMIC QUALIFICATION

- BTech – RGPV, Madhya Pradesh

PROJECT EXPERIENCE

Project: Augustine (Dec 2023 – Mar 2025) | Ovyo Services Pvt. Ltd.

Tech: Kotlin, Jetpack Compose, Leanback UI, Clean Architecture, Hilt, Coroutines + Flow, WorkManager, Brightcove, Firebase, Crashlytics, GitHub Actions

Role: Lead Android Developer – Designed and delivered end-to-end OTT TV app

- Built modular architecture with Hilt for dependency injection, improving scalability and maintainability.
 - Integrated Brightcove & ExoPlayer for seamless video playback with Leanback support on Android TV.
 - Implemented offline-first caching (Room + Coroutines/Flow), enhancing playback experience.
 - Used WorkManager for subscription sync and background prefetch of content.
 - Automated releases with GitHub Actions CI/CD, cutting deployment time by 30%.
 - Ensured app quality with JUnit, MockK, Espresso tests; maintained <1% crash rate.
 - Added push notifications (FCM) for subscription and content updates.
 - Monitored performance via Firebase Analytics & Crashlytics.
-

Project: Capra-TV (Mar 2023 – Sep 2023) | Robosoft Technologies Pvt. Ltd.

Tech: Kotlin, Clean Architecture, Leanback, Brightcove, Firebase, Crashlytics

Role: Senior Android Developer – OTT TV app for streaming movies & series

- Designed scalable Clean Architecture layers with dependency injection.
- Integrated Brightcove player with Android TV's Leanback components.
- Optimized caching and playback flow, improving app responsiveness by 20%.
- Enhanced stability through Crashlytics monitoring and proactive bug fixes.
- Collaborated with designers and backend engineers to deliver feature-rich TV experience.

Project: Cricroc (Willow TV) (Mar 2022 – Mar 2023) | Robosoft Technologies Pvt. Ltd.

Tech: Kotlin, MVVM, WebSockets, CleverTap, AppsFlyer, Firebase, Bitmovin Player, Picasso

Role: Senior Android Developer – Cricket OTT app with live streaming, scores, replays

- Integrated Bitmovin Player with Chromecast & Picture-in-Picture support.
- Built real-time features (scores, notifications) using WebSockets + Coroutines.
- Implemented multi-mode subscriptions with deep linking (AppsFlyer).
- Standardized UI components for consistent brand experience across screens.
- Designed analytics integration with CleverTap + Firebase for user engagement tracking.

Project: Rumble Gaming App (Mar 2021 – Feb 2022) | Tech Mahindra

Tech: Kotlin, MVVM, WebSockets, Firebase, CleverTap, AppsFlyer, Glide, Picasso

Role: Senior Android Developer – Gaming platform with 100+ casual games

- Delivered real-time tournaments & polls using WebSockets.
- Integrated wallet system for in-app purchases and rewards.
- Built referral & deep linking flows with AppsFlyer and CleverTap analytics.
- Implemented push notifications (FCM) for engagement campaigns.
- Optimized image loading via Glide/Picasso, improving UI performance.

Project: Kahramaa (Jan 2020 – Feb 2021) | Tech Mahindra

Tech: Kotlin, MVVM, Room, Retrofit, Firebase, Picasso, Glide

Role: Android Developer – Utility app for Qatar's Electricity & Water services

- Designed and implemented service management flows with MVVM + Retrofit.
- Built offline persistence with Room DB for critical data.
- Integrated Firebase push notifications for bill alerts & reminders.
- Improved customer engagement with custom dashboards & analytics tracking.

Project: Max Router (Jan 2019 – Feb 2020) | Credentek Software Pvt. Ltd.

Tech: Java, MVC, SQLite, Retrofit, Firebase, Glide

Role: Android Developer – IoT-based router management app

- Developed Bluetooth-enabled router control features.
- Designed custom UI components for device monitoring.
- Built secure API integrations with Retrofit + authentication.
- Led technical discussions & solution proposals with cross-functional teams.
