

DevOps Engineer

Kalyani Bomewar

📞 Mobile: +91-8806674545 ✉ Email: bomewar.kalyani@gmail.com

Professional Summary

DevOps Engineer with 7 years of progressive IT experience, specializing in process automation and optimization across the software development lifecycle. Proficient in CI/CD, infrastructure management, and driving scalable, efficient, and reliable solutions. Skilled in collaborating with development and operations teams to ensure seamless deployments and enhanced system performance.

- Skilled in **source code management with Git and Github**, implementing **branching strategies, GitOps workflows**, Knowledge on Branching and Tagging concepts in Version Control tool GIT, and integrating SCM with tools like Jenkins, azure devops.
- Hands-on knowledge & practical experience with **GCP services** like compute engine, GCP buckets, cloudsql, IAM roles, Google artifact registry, load balancing etc.
- Proficient in using **Docker** to build, manage, and deploy containerized applications, with expertise in **orchestrating containers with Kubernetes**.
- Experience in building **Continuous Integration (CI) & Continuous Deployment/Delivery(CD)** pipeline as an iterative process using YAML scripting.
- Hands-on knowledge & practical experience with **Azure cloud services** like VM, V-net, VM Scale-set, Azure storage, Azure-DB, NSG, etc.
- Hands on experience in infrastructure provisioning using **Terraform**.
- Knowledge on **Build management tools** like Maven, Gradle.
- Experience with phases of the **software development life-cycle** with a specific focus on the build and release of quality software through DevOps tools.
- Working knowledge of **Shell scripting** languages including BASH for Linux, windows platforms.
- Good Interpersonal Skills, team-working attitude.

Certifications

Google Cloud Associate Cloud Engineer — Issued November 2024

Technical Skills

Category

Cloud Platforms

SCM Tools

Tools & Technologies

Google Cloud Platform, Azure

Git, GitHub, Azure Repos

DevOps Engineer

IaC Tools	Terraform
Build Tools	Maven, Gradle
CI/CD Tools	Azure DevOps, Jenkins
Ticketing Tools	Jira
Operating Systems	Windows, Linux
Scripting Languages	Shell Scripting
Application Servers	Nginx, IIS
Containerization	Docker
Orchestration	Kubernetes

Employment Details

Senior Software Engineer

Aziro Technologies (Formerly MSys Technologies Ltd) — July 2022 to Present

Software Associate

Cognizant — April 2018 to July 2022

Education

Qualification	Institution	Year	%
B.Tech CSE	Jhulelal Institute Of Technology	2014	72.1%
Intermediate	Dr. Ambedkar College	2010	75.2%
SSC	Somalwar High School	2008	87.2%

Project Experience

Project: Bakkt

Role: Senior DevOps Engineer

Duration: July 2022 – Present

Responsibilities:

- Created and maintained GitHub repositories, managing access, branch protections, and collaboration settings to ensure code quality and security. Integrated GitHub with Azure DevOps and Jenkins.
- Designed and optimized CI/CD pipelines using azure devops, yaml scripting for seamless application deployment across development, testing and production environments.
- Worked on migration of Jfrog Artifactory to Google Artifact Registry.

DevOps Engineer

- Built custom Docker images and deployed applications using Helm in GKE.
- Automated infrastructure provisioning such as VM, GCS buckets, GAR repositories, using Infrastructure as Code (IaC) tools such as Terraform.
- Played a key DevOps role in migrating critical workloads from on-premises infrastructure to Google Cloud Platform (GCP), enhancing scalability and reducing operational overhead.
- Setting up of cronjobs for scheduled deployments and writing shell scripts to automate repetitive tasks.
- Managed Kubernetes scaling, troubleshooting crash loop backoff debug, Kubernetes Pod logs, and debugging pod restart and resolving all those pods and logs in all environments.
- Integrated Datadog for logging and monitoring.
- Mentored junior engineers and led DevOps practices.

Project: Sundyne

Role: DevOps Engineer

Duration: May 2020 – July 2022

Responsibilities:

- Handling access request tickets for azure active directory groups through Jira ticketing.
- Worked with GitHub repo management and managing pipeline variables, secrets, and secure credentials using Azure Key Vault and variable groups.
- Documented pipelines and deployment steps.
- Participated in troubleshooting failed builds or deployments, gathering logs, and escalating issues when necessary.
- Helped configure azure storage accounts, access keys, SAS tokens, and Azure AD-based access to secure storage access based on project needs.

Project: Sundyne

Role: Quality Analyst

Duration: April 2018 – May 2020

Responsibilities:

- Prepared test cases and performed regression testing.
- Logged detailed defect reports using tools like Jira.
- Handled support tickets and Maintained test scenarios, execution results, and traceability matrices.
- Participated in sprint planning, daily standups, and retrospective meetings in Agile environments.
